Park. The master plan was adopted by the Washtenaw County Parks & Recreation Commission in August 2017. Plymouth road bisects the property which is around 98 acres. The farm has partnered with the Michigan Folk School. The school is a non-profit that offers classes for traditional folk skill building and arts. They were looking for a campus to host their classes. The school will be located on the south side of the property. The north side of the property will contain hiking trails and program opportunities on the historic farm. The Parks & Recreation Commission brought in a consulting firm. In November work began on building chicken coops and came up with plans to save the farm buildings on the property. In the spring, Rowe Profession Services, a consulting firm helped develop a detailed plan for the property. There will be hiking trails around the pond, play structures, a nature trail north of the pond, etc. on the north side of the property. After soil testing it was determined that the west of the property will not support a parking lot. So, the parking lot will be located on the east side of the property. There will be a pavilion, public restrooms, and eventually a playground on the site. Don Staebler's old workshop building will be converted into a blacksmithing and woodworking studio for the Michigan Folk School. Both projects should be complete by mid-October. There are plans for improved septic to accommodate the workshop building. A multipurpose building will also be built on the property to host additional classes. A kitchen for the building was donated by Google. There will also be free public events held on the property. Supervisor Schwartz inquired about the status of the farm house on the property. The Parks & Recreation Commission is looking into stabilizing the house. They project that it will take 5 years to get the house stable and in condition for use. Supervisor Schwartz also asked about animals returning to the property. Small farm animals will eventually return to the property. The commission will honor Mr. Staebler's request of not allowing water crafts on the property. There will be fishing piers for children installed after the trails are added. The park should be fully operational in 18 months.

8. REPORTS

A. SUPERVISOR REPORT

Supervisor Schwartz reported on the following:

- The Fire and Police Millages passed at the August 7 primary.
- The application was approved for \$1,000,152.00 for the FEMA Safer Grant.
- The supervisor has found one volunteer to work on the committee to amend the hunting ordinance. He is looking for one or two more people to serve on the committee. Hopefully the committee will begin working on amending the ordinance in September. Former Supervisor McFarlane believes that it has been over 40 years since the ordinance has been amended.
- The township met with lawyer Fred Lucas last week to discuss opting in to the Medical Marihuana Facilities Licensing Act (MMFLA) in the township. The supervisor consulted with the Department of Licensing and Regulatory Affairs

(LARA) and Fred Lucas and was advised that an ordinance was required to opt-in. Supervisor Schwartz stated that passing an ordinance is a 6-8 month process. Darrell Stavros stated that a municipality consultant informed him that an ordinance was not needed. Supervisor Schwartz said that he was willing to talk to the consultant if they were aware of a different approach that could be taken.

- Township staff met with the township's new IT provider, Nimble Systems, for a visioning session. Transitioning of responsibilities has begun from Parhelion to Nimble.
- Supervisor Schwartz has received questions regarding the generator located on Prospect Rd. He received an email and call back from Derrick Johnson with DTE. The purpose of the generator is to provide additional power to the area as there is insufficient power in the area. The generator will be removed in mid-September as power needs drop off. They are working on plans to permanently boost the generation of power to the north side of Superior Township.
- DTE has notified him that the planning for the installation of street lights on MacArthur Blvd have been completed. The installation should be complete in mid-September.
- Clerk Findley discussed Election Day issues. The Absent Voter County Board (AVCB) was the last to submit results for the August 7 primary. There were rumors of missing ballots. There were no missing ballots. This was the first AVCB used under Clerk Findley and lessons were learned to take to the November 6 general election. Supervisor Schwartz stated that the township is struggling to find election workers. He said that there is less interest in working the elections than there was a half generation ago. He also said that the township is looking into increasing pay for inspectors. The township is in need of non-Democrat election workers as most of our inspectors identify as Democrat and the goal is to balance out the parties, as much as possible, at each precinct.

F. RESOLUTION 2018-26, RESOLUTION TO WAIVE PENALTIES FOR NON-FILING OF PROPERTY TRANSFER AFFIDAVIT

There has been a change in the law that if a property owner does not file a property transfer affidavit (PTA) within 45 days there is a penalty of \$200.00 for every day that it is not filed. The township cannot accept a PTA until the penalty has been paid. The township has had very few PTAs that have not filed. The assessor feels that it would be an undue burden for the township to collect the penalty from owners.

It was moved by McKinney, supported by Williams, to approve the waiver of penalties for non-filing of the property transfer affidavit.

- IV. Agenda Approval
It was moved by Nahid Sanii-Yahyai and supported by Sandi Lopez to approve the agenda as drafted. The motion carried.
- V. Prior Meeting Minutes Approval
 - A. July 23, 2018
It was moved by Nahid Sanii-Yahyai and supported by Sandi Lopez to approve the minutes of 7/23/18 with clerical corrections. In Citizen Participation, the last sentence which presently reads "These small plants grow large and produce seeks a year later" should be corrected to read "These small plants grown large and produce seeds a year later." In Reports A. Chairperson, the second sentence that presently reads "The "Come Out and Play program will end on August 9with a kickball event..." should be corrected to read "The Come Out and Play program will end on August 9 with a kickball event...." The motion carried.
- VI. Citizen Participation
Ellen Kurath spoke about the condition of trees planted and the presence of weeds in Schroeter park, North Prospect park and Cherry Hill Nature Preserve (CHNP). Ellen also presented a detailed written outline of her findings to the Park Commission. Park Commissioners thanked Ellen, and asked park staff to follow up with her on her findings and suggestions. Ellen's written report will be copied and provided to all Park Commissioners.
- VII. Reports
 - A. Chairperson
Chair Marion Morris reported the Movie Night on August 11 was a success. Approximately 120 people attended. Nahid Sanii-Yahyai received several positive comments.
 - B. Administrator
Juan Bradford submitted a written report. In response to commissioner questions, he responded that the vendor screening the movie handled everything. That vendor has additional entertainment options available we may want to consider for a future year, to present before the movie starts. These could include magicians, balloon artists, musicians and others. Some concern was expressed by attendees that the movie was not loud enough.

C. Board Liaison

Trustee Alex Williams reported on the Township Board meeting held August 20. County Parks & Recreation staff provided a report on Staebler County Farm Park development. Plans for this part are up on the Washtenaw County website, and soon will be up on the Superior Township website. Both Fire Fund and Law Enforcement Fund millage requests were approved in the August 7 election. A FEMA funded grant was awarded and accepted to provide three new firefighters. The hunting ordinance will be reviewed for potential updating. Volunteers are sought to serve on the review committee for the hunting Ordinance. Supervisor Schwartz met with Attorney Fred Lucas about a marijuana ordinance. An ordinance for a growing and processing facility may be drafted. Nimble, the new IT contractor, inventoried all IT assets. The DTE Energy generator sitting on N. Prospect Road is there to cover peak electricity demand during the summer months. The generator should be gone during September. Streetlights should be installed on MacArthur Boulevard during September. There have been many problems with Republic Waste picking up garbage and recyclables. Clerk Lynette Findlay noted there were no problems with the Absentee Ballot Count Board during the August 7 election. Election workers are needed. Please contact the Township Clerk's office if interested. Trustee Rod Green resigned to take a position on the Washtenaw County Road Commission. There were four applicants to fill the open position on the township board, and Megan McFarlane Winslow was appointed to it. The Dixboro House development agreement was approved for the structure formerly housing the Lord Fox restaurant, and later Roger Monks restaurant. The business will be a restaurant again. A new copier was acquired for the township offices. Warren Road culvert engineering was approved. Zoning Review fees were adjusted, and escrow accounts established for these fees. State law requires a penalty for transferring property without paying all fees on time. Superior Township chose to waive the penalties on these fees if paid late. New security cameras were installed on the Township Hall structure.

D. Board Meeting Attendee

Paula Jefferson attended the August 20 meeting and concurred with Trustee Williams' report. She added some more detail on the marijuana ordinance discussion with Darryl Stavros and on the Staebler County Farm Park plans. To install a grow and process facility, an ordinance must be adopted, and that process will take six to eight months.

Re: PSU Price for 2019 – 2022

Dear Police Services Contracting Partners:

On March 7, 2018 the Washtenaw County Board of Commissioners approved the price of a Police Services Unit for the next four years: 2019, 2020, 2021 and 2022. In 2019 and 2020, there will be no increase from the 2018 price which is \$160,650. In 2021 and 2022, there will be a 1.5% increase each year: \$163,060 in 2021 and \$165,506 in 2022.

Multiple year pricing helps to provide certainty and stability for our contracting partners as well as the WCSO and the County. Knowing in advance what Police Services prices will be helps to facilitate better planning over time for our contracting partners and the County, in anticipation of future budget needs and possible millage renewals.

The Washtenaw County Sheriff's Office appreciates your continuing partnership in assuring the provision of high quality, cost effective police services to our County. Our partnership and collaboration benefits all the residents of Washtenaw County. Please feel free to contract me at claytonj@washtenaw.org if you have any questions or concerns.

Sincerely,

Memorandum

To: Lynette Findley, Superior Township Clerk
From: Mary Burton, Utility Administrator
Date: September 11, 2018
Subject: Water Rate Increase

Background

The Township recently received notification of a water rate increase, effective October 1, 2018 (this equates to a September 1, 2018 increase, since YCUA dates their September invoice to Superior Township October 1), from the Ypsilanti Community Utilities Authority (YCUA), which is one of our suppliers. As a direct result, it will be necessary for us to pass along a rate increase to our residents, who reside in the YCUA Water District.

Attached is a Resolution amending (increasing) the rates, fees and charges related to water services provided by the Township through the Utility Department. Also attached are a press release and a Schedule A showing the new rates.

The amendment addresses price increases for our residents who receive their water services from us through YCUA only.

YCUA Provided Water Services (Note: All rates are in Hundred Cubic Feet)

* Water Rate Increase to the Township = 2.86% * Water Rate Increase to the Residents = 2.82%

The new rate for YCUA provided water will be \$5.83 per ccf (from \$5.67). An average quarterly residential water bill of 2,600 cubic feet will increase by \$4.16. A minimum water/sewer billing of 1,000 cubic feet will go from \$96.30 to \$97.90 per quarter. The increase will affect bills to customers dated September 1, 2018, or later.

Recommended Action

It is recommended that the Charter Township of Superior approve the Resolution to increase the water rates.

PRESS RELEASE

On September 17, 2018, the Board of Trustees for the Charter Township of Superior approved a price increase for water for users who receive their services through Superior Township from the Ypsilanti Community Utilities Authority (YCUA).

The new rate will be effective on bills to Superior's customers dated September 1, 2018, or later.

The increase for Superior's YCUA supplied customers will be 2.9% for water. An average quarterly residential bill of 2,600 cubic feet will go up \$4.16. A minimum water billing of 1,000 cubic feet of water/sewer usage will go from \$96.30 to \$97.90 per quarter.

For further information, contact the Superior Township Utility Department at 734-480-5500 or visit the Superior Township website at www.superior-twp.org.

Lynette,

Recently, we have had a few occurrences of blackish water from faucets and in bathroom fixtures. Ricky from the Utility Department sent out water samples to be tested for me. The testing results indicate the water discoloration is the result of high Manganese levels. Additionally, the testing revealed that we have high levels of Arsenic, Copper and Lead as well. I have attached the test results for your use.

I contacted Jason McCray from Culligan to come out and make recommendations. Culligan currently services our existing water softener system. Jason has indicated that our existing water softener is functioning normally and sees no reason to replace it. He recommends that we install an automatic filtration unit before the existing softener to mitigate the Arsenic, Manganese and other heavy metals. I have attached his proposal and product information for your use at the next Board meeting. Ken has suggested this be a motion rather than a resolution.

I called Jason to verify one item in his proposal. Midway down his proposal, he indicates a labor price of \$1,986.00 for "remove existing and install new softener unit". This was an error on his part as he clearly stated in his email that the existing softener stays in place.

Please let me know if you have any questions.

Rick

Good Morning Rick,

Thank you for inviting me out, yesterday, to review the water treatment needs for your facility. My recommendation is to add an automatic filtration unit before the existing softener system. This filtration unit will include a specialty media (Katalox Light) that is capable of reducing all of the elements that tested high in your test results. The current softener system is functioning normally, so I don't see a need to replace it at this time. The combination of a new filtration system and the current softener system will ensure that the water quality will meet EPA primary drinking water standards.

Please review the attached proposal and product brochures and let me know if you have any questions or need additional information. The Culligan CTM brochure will give you a general description of the proposed unit, but the media will be different from what is listed. A brochure on the filtrate media that will be used is attached as well.

Thanks again and have a good day.

WHAT IS KATALOX LIGHT®?

KATALOX LIGHT® is a new brand of revolutionary advanced filtration media completely developed in Germany. It's composition simply makes it outstanding against the contemporary filter media available in water treatment industries, like sand, BIRM, Greensand Plus, Manganese Greensand etc. **KATALOX LIGHT®** is manufactured in Germany.

KATALOX LIGHT® is engineered with unique MnO₂ coating technique on **ZEOSORB®**, providing it light weight, higher filtration surface, more service life and more reliable performance (filtration down to 3 µm) than any other existing granular filter media.

KATALOX LIGHT® is being used in numerous system for residential, commercial, industrial and municipal applications worldwide, for High level filtration, color and odor removal, Iron, Manganese, Hydrogen sulfide removal, efficient reduction of Arsenic, Zinc, Copper, Lead, Radium, Uranium and other radionuclides and heavy metals.

KATALOX LIGHT® is Certified to NSF/ANSI-61 standard for drinking water applications and has met the ANSI/NSF 372 Lead free compliance.

Advanced use

High concentration coating of MnO₂ on the **KATALOX LIGHT®** surface (10%) is the biggest advantage compared to any similar product available in the market. This makes the oxidation and co-precipitation of contaminants much more effective. For removal of very high concentration of contaminant it's recommended to use H₂O₂ as an oxidizer, which provides accelerated catalytic oxidation on the surface of the media. Conventional oxidizing agents like chlorine or potassium permanganate also could be used if required.

KATALOX LIGHT® can be used for Arsenic, Radium, Uranium removal but in these cases there is requirement of Iron in the water. **KATALOX LIGHT®** system is designed with special iron dosing technology which has many advantages over Adsorbent media used for Heavy Metal removal.

The Future

The future of water treatment, as we see it, is going to give us more difficult challenges and we all need more advanced and robust products.

In Watch Water®'s vision, **KATALOX LIGHT®** can be addressed for advanced concepts like Water Reuse, Controlled Adsorption of Arsenic and Heavy Metals, advanced Membrane pre-treatment, Zero-Discharge Cooling tower etc.

Contact us for information.

Standard Packaging:
1 ft³ bags (28 Liters);
Mass: 30 kg (66 lb)
40 bags on a Pallet
16 Pallets in a container

Watch Water® **KATALOX LIGHT®** systems offer a new technology with advanced catalytic filtration available in water treatment industry. All systems have been engineered keeping both professionals and consumers in mind. Systems are available with different models and customized for manual back-wash without using electricity or it can be made fully-automatic. System can be used in a variety of applications including residential, commercial and any process water applications for food and beverage industry.

Standard systems are designed with a filtration velocity of 20 m/h (8.2 gpm/ft²) to provide a good filtration. This value may differ for advanced application like Arsenic, Radium, Uranium and other

* Optional: Only if the water doesn't have sufficient ORP (Oxidation Reduction Potential) to oxidize the contaminants. OXYDES-P helps to keep the media surface clean and could be used during backwash.

Warning: Do NOT exchange pressure vessel media from one pressure vessel to another. Reason for inadequate sanitation during the exchange of media. Wet media will absorb nitrogen and oxygen in the air which will immediately kick off the bacteria growth. Biofouling on surface of media and other contaminants are present during the exchange. Media is designed only for iron manganese, hydrogen sulfide and other heavy metals. Media containing biofouling cannot be reused as it is harmful for drinking water. Replacing new media is highly suggested.
