

SPRINKLER METER POLICY

1. The customer opting for a sprinkler meter will pay Superior Township Utility Department (STUD) the current fee required for the meter, reading device, and installation.
2. The customer will reconfigure the plumbing so that the sprinkler meter will measure water going outside of the building only and the water will not enter the sanitary sewer system.
3. The customer will be billed for water on the sprinkler meter based on the current rate schedule. Sewage will not be billed on sprinkler meters.
4. The customer understands that the sprinkler meter is a permanent fixture of the plumbing and once installed, it cannot be removed.
5. In the event an outside watering restriction is imposed by water providers including Superior Township, Ypsilanti Community Utility Authority (YCUA) or Great Lakes Water Authority (GLWA), all parties will be required to comply with all restrictions.
